DETAILED ACTION

1. This action is in response to the papers filed September 26, 2006. Currently, claims 13-16, 20-24, 27-32, 36-44, 48-52 are pending. All arguments have been thoroughly reviewed.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance.

The claims have been amended to clearly require the "mutant" domain in the polymerase domain that has the ability to incorporate nucleotides, i.e. the polymerization domain. The specification indicates that the critical motif is in the polymerase domain that has the ability to incorporate nucleotides (see page 3, lines 28; page 35, lines 34-36). This amendment to require that the motif is located in the polymerization domain overcomes the art of Berquist. Berquist teaches the structure of the mutated motif, however this structure is not located in the polymerization domain, it is located in the exonuclease domain. Berquist does not teach a mutated motif in the polymerization domain. Therefore, the amended claims which require the mutant thermoactive DNA polymerase is not taught or suggested by the art.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
